

**NORTH WEST
CYBER SECURITY CLUSTER
OPEN EVENT: SCAMS: ARE YOUR
STAFF PUTTING YOUR BUSINESS
AT RISK?**

WHEN: THURSDAY 10th September, **TIME:** 3:30PM – 5:45PM. **WHERE:** The Walnut Room, The Centre, Birchwood Park, Warrington, WA3 6YN

The North West Cyber Cluster invites you to attend our latest Open Event which will focus on email scams. Phishing emails, Spear Phishing and Harvesting Websites are a nuisance but more importantly, can cause thousands in loss of data, breaches in financial information and allowing more sophisticated software to infect your business network.

The event will be overseen by Phil Smith of Cyber Protection Services Limited and will be representing the North West Cyber Security Cluster. From our members, we will have knowledgeable talks presented by Ric Derbyshire of Sanitas Data Security Limited and Zentek Forensics. Also in attendance will be our guest speaker, Chris Burton of Amec Foster Wheeler, who has conferred his insightful presentation at many high profile cyber security events. There is the opportunity to network both before and after the event with time set aside for questions and answers.

THE EVENT WILL COVER:

- **Phishing emails** – What are they and what do they do?
- **Spear Phishing** – How targeted attacks work.
- **Harvesting Websites** – What harvesting websites are, how they can infect your network and use the stolen information.
- **Prevention** – What you can do and how our members can help.

Book your place by emailing
leanne.darby@nwcsc.org.uk
